Projects

Ebook Application of Makalu Publication House that features any users to register, login. They can browse a book and buy the book using an online payment gateway like **Esewa, Khalti**. They can read the book over there but can't download. Live of this application is [here](#).

Awesome Invoice is a solo project of mine that help small retail store for maintaining stock, purchase, invoices and some analytical dashboard. I have uploaded this project on GitHub Link for this project is [here](#).

JobMalai is a solo project of mine that provides the platform for Jobseekers & Employers to find their dream jobs and Employee. This project is developed on Laravel and VueJs. One can register as an Employer or Jobseeker. Employee has to create a detailed account and post a job. The unlimited job can be applied from a Jobseeker Account. An employer can view the job application from the job seeker and approve or disapprove them. Live link of this project is [here](#). And Demo video is [here](#) on youtube.

I have done other website projects but unfortunately, they aren't live so I can't present them here.

AWARDS

Best presentation awards in INTER & INTRA college **Hackathon** called **ASIANHACK** organized by Asian School of Management & Technology.

#Reference Anil Lal Amatya (Principal) of Asian School of Management & Technology
